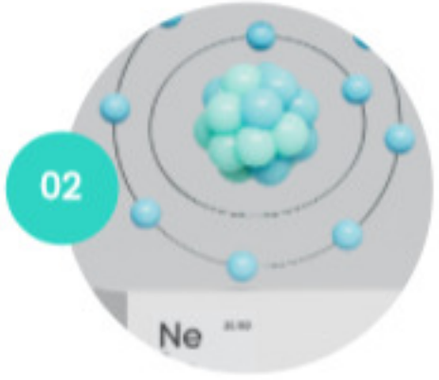
1. Health Report Challenges and User Needs

Understanding Medical Report Difficulties

Complex Medical Language

Medical reports often contain technical terms, making them hard to understand for users.



Need for Clear Health Info

Users want simple, key health information that is easy to grasp and remember.

Common User Frustrations

Users face confusion, stress, and barriers when interpreting detailed medical data.

Why Users Need Simplified Health Insights

Common User Groups

Elderly and non-English speakers often struggle with complex health reports.

Need for Accessible Language

Simple language and clear formats improve report comprehension for all users.

Impact on Health Decisions

Misunderstanding health information can lead to poor and unsafe medical choices.

Core Problem Summary

Key Challenges in Health Reports

Health reports are complex, filled with jargon, and users often lack sufficient background knowledge.

Impact of Poor Accessibility

Difficult reports lead to confusion, misinterpretation, and reduce users' ability to make informed decisions.
